USRP based Cognitive Radio Test-bed using OpenBTS

Abrar Ahmad (113310017) Swrangsar Basumatary (09d07040)

Department of Electrical Engineering IIT Bombay, Powai

June 2014

Problem Statement

- ► To develop a testbed for cognitive radio demonstrating coexistence of primary (licensed) users and secondary (unlicensed users)
- ► A two frequency testbed (channels used 945 MHz and 955 MHz)
- ► A four frequency testbed (936 MHz, 943 MHz, 950 MHz, 957 MHz)

Overview of the tasks accomplished in our project

- ► Cognitive radio?, spectrum holes?
- ► GNURadio
- ► Python programming language
- ► USRP kit
- ► OpenBTS
- ► Calls and SMS service on local network
- Spectrum sensing techniques
- ► Defining problem statement

Thank You
